## **Datos importantes:**

Cada línea contiene 25 "cosas" GRATUITAS en Steam (juegos, contenido descargable... todo gratis).

Si haces más de 50 peticiones en 60 minutos, es posible que obtengas un bloqueo temporal en Steam durante 1 hora, por lo que debes hacer 2 líneas cada 60 minutos como máximo. Se recomienda esperar unos minutos más para estar seguro.

El bloqueo sólo significa que no puedes añadir más juegos durante esa hora, no te bloqueen la cuenta, no te impide jugar ni nada de eso.

## Pasos a seguir:

- Ve a Windows y abre Ejecutar o presiona la tecla de Windows + R.
- En ejecutar escribe: steam://open/console y presiona ENTER.
- Esto te abre la consola de Steam, donde abajo puedes escribir el comando que quieras. Copia y pega una línea de las inferiores y presiona ENTER.
- Dirá que está solicitando una licencia y tal... Ahora revisa la página de licencias (https://store.steampowered.com/account/licenses/) y te mostrará todas tus novedades gratuitas. Ya las tienes para siempre en tu cuenta de Steam. Si las quieres instalar para jugar también puedes hacerlo ahora.

\*Se recomienda copiar toda la lista en un documento de texto y luego eliminar las filas que ya has agregado, así sabes por cuál vas.
